EDUCATION

B.Tech in Computer Science & Engineering

2020 – 2024

Netaji Subhash Engineering College (MAKAUT)

GPA: 9.53 / 10

PROJECTS

Real-Time Writeboard with Chat (Django Channels)

[GitHub Repo](#)

- Built a real-time collaborative writeboard using Django Channels and Redis
- Enabled live text synchronization across multiple users and rooms
- Integrated real-time chat alongside collaborative editing
- Designed a responsive UI using HTML, CSS, and JavaScript

ChatRoom — Real-Time Web Chat

[GitHub](#) | [Live Demo](#)

- Developed a real-time web chat application using Django Channels and WebSockets
- Implemented typing indicators and online/offline user presence
- Added room-based messaging with automatic join and leave notifications
- Deployed with production-ready configuration on Render

TechReview — Product Review Platform

[GitHub Repo](#)

- Built a full-stack product review platform using Django
- Developed REST APIs with Django REST Framework
- Implemented authenticated product rating and review submission
- Designed categorized product browsing with modern UI components
